

The COVID 19 prevention process will not start

“Studies show that those who cover 25 percent (or more) of their daily caloric intake from sugar double their chances of dying from cardiovascular disease. “The silent killer has been poisoning people with sugar for decades, most of the people have died from the virus. 1. Alcohol formation, 2. Myocardial infarction, 3. Thrombus formation, 4. Diabetes, 5. Obesity, 6. Gastrointestinal diseases, 7. Gout and osteoporosis, 8. Cancer, 9. Vitamin and trace element deficiency, 10. Disorders of the endocrine system, 11 Fatigue. Diabetes increased in 70% of children aged 0-5 years over the age of 20 years. (Philadelphia Dr. Terri H Lipman) Already the mother is poisoning the little one. Geneva patent number N^o WO 1995016355 A1 “In doughs made with sugar and baking, sugars are replaced by milk proteins. Confectioners can produce at least 7, bakers 5-6, biscuit makers 4-5 dough groups. They are forced to use sugars that caramelize under the influence of heat, at which point the dough will be digestible. The world sells as much pasta made with sugar as the quantity of butcher's goods. If 1 million hamburgers are sold in a second in the world, then we eat a minimum of 1,600 kg of sugar. SHOULD NOT BE. 200 g of crackers does not need 32 g of sugar. Milk is not toxic! Vitamins and minerals in breast milk are included in dairy cakes. Many dairy processors discharge many valuable by-products into the sewer or are fed to animals. Profits in the dairy industry are declining. Milks are cheaper, lactose content 100g / 1-3 g, also recommended in China, Asia. Germans wrote “this is an anonymous no one can do it” I didn't do it alone God felt sorry for people. All pasta made with sugar can be converted to milk pasta based on a mathematical table. I have been working on the dairy project for 32 years, I hold there as my role model Semmelweis Ignatius, (he was beaten to death, not yet me) 34 years later they started using chlorine. I haven't read anywhere how many children and mothers could have saved their lives. I know for sure that if cakes were to be produced on an industrial scale 32 years ago, COVID 19 will not appear in 2019.

“The history of Semmelweis also proves that human nature is unchanged in every age. There have always been, are and will always be those who, out of selfish interest, vanity, jealousy, hinder the development of the world. But these people are dying on the filter of history, which is why we can feel how beautiful the world used to be. So when faced with obstacles, we must not despair and give up the fight, just as Semmelweis did not. Semmelweis's teachings on hygiene are timeless.” Dr. Orsolya Surján 2015.
